- **Frameworks & Libraries:** Flutter, FlutterFlow, Node.js, Spring Boot, FastAPI
- **Cloud & DevOps:** AWS, Azure, Docker, Git, Jira, Figma
- **Databases:** PostgreSQL, MongoDB, Supabase, Firebase, MySQL
- **Certifications:** AWS Foundations.1

PROFESSIONAL EXPERIENCE

Flutter & FlutterFlow Developer | ELEMENT 16 MEDIA | Nov 2024 – Present | Remote | **Telford UK**

- Designed and built the **Kibout Mental Health App**, **Touchline Football Club App**, and **Kinderharrie Football Club App** using FlutterFlow and Supabase.
- Ensured the apps provided seamless user experiences, optimized functionalities, and served over **10K+ active users** in total.
- Enhanced user engagement by **30%** and reduced app load time by **20%** through performance optimizations and feature improvements.

Growth Engineer | Flutter Developer | NEXL | Dec 2024 – Present | Remote | Australia

- Led the development of **LoopedIn**, a 5-minute LinkedIn app for law firms, where AI generates comments and recreates posts.
- Integrated **500+ user profiles** and managed content generation for **1000+ posts** per month.
- Streamlined content creation and engagement for law firms, improving interaction rates by **25%** and significantly reducing manual post creation.

Freelance Flutter Developer | Upwork | May 2024 – Present | Remote

- Built **GuardLink X**, a Security SaaS app for a Netherlands-based company, where security guards could register and contractors could manage shifts.
- Developed a platform handling **500+ security guard registrations** and **300+ shift assignments** per month.
- Reduced manual shift management efforts by **40%**, increasing operational efficiency.
- Created **CaptionGenie**, an app generating trendy Instagram and TikTok captions with customizable options for hashtags, CTAs, emojis, and tone.
- Attracted **2K+ active users** within the first 6 months and increased app engagement by **15%** through caption customization features.
- Helped influencers and marketers improve social media engagement, boosting post interaction by **20%**.
- Worked as a backend engineer for a **Restaurant Management App**, implementing management features with Supabase.
- Developed a backend system to manage **1,000+ daily orders** and real-time inventory updates.
- Streamlined restaurant operations, reducing order processing time by **25%** and improving staff efficiency.
- Built a **Jobs App**, allowing users to find and assign jobs within a specific radius, like Uber but for electricians.
- Enabled **500+ job assignments** per month and simplified job location matching for **1000+ users**.
- Improved job allocation efficiency, reducing the time taken for users to find workers by **30%**.
- Designed an **Investment Dashboard**, automating the management of investment portfolios, returns, and interest payments.
- Managed **$500K+ in client investments**, automating monthly returns and interest payments.

- Increased transparency and client trust, improving satisfaction and reducing manual data entry by **50%**. Developed a **VPS Parking App** to manage parking in the UAE.
- Helped **2000+ users** book parking spaces and provided real-time updates on availability.
- Increased parking space occupancy by **35%** in the first 3 months, optimizing urban parking management.

Flutter Developer | May 2022 – May 2024 | On-Site | Women Digital Space | Peshawar, Pakistan

- Developed **apps** covering fleet management, healthcare, and fraud detection.
- Led backend development for a **MedTech app**, improving appointment booking efficiency by **50%**.
- Worked in an **Agile team** of designers, PMs, and QA engineers to launch new features.

EDUCATION

MSc in Computer Science | University of East London | Sep 2024 – Present
Focus: **Big Data, AI & Machine Learning, Advanced Software Engineering, Cloud Computing**

BSc in Software Engineering | Iqra National University | Sep 2018 – Sept 2022
Final Year Project: Built an **AI-powered chatbot** for real-time customer support, improving user engagement by **30%**.

PERSONAL PROJECTS

- **YouTube Clone** – Built a YouTube clone using **AWS, Flutter, and Docker**.
- **Music Streaming App** – Developed with **PostgreSQL, Flutter, and FastAPI**.
- **Skill Swap App** – Built using **Flutter & Spring Boot**, allowing users to exchange skills.
- **E-Commerce App** – Amazon-style platform developed with **Node.js & MongoDB**.
- **VPS Parking App** – Designed a **UAE-based** smart parking system for vehicle management.
